	<i>Description: concrete with patio cover;</i>						
	<i>Approved with comments below:</i>						
	1. Long side(south as shown) requires more support as max span is exceeded , a couple options are to add posts or use engineered lumber.						
	2. Existing house wall that will support structure will need framing exposed to confirm adequate support.						
	3. Post to to beam connection as shown is insufficient, this connection can be notched/lag bolted or an engineered bracket(i.e. SimpsonStrong Tie)						
	4. Roof to roof connection must be pitched for water flow.
